Nagase & Co., Ltd.

NAGASE Named to CDP 2025 Water Security A List for Fourth Consecutive Year

Nagase & Co., Ltd. (Chiyoda-ku, Tokyo; Representative Director, President and CEO: Hiroyuki Ueshima) has been selected as an “A-List” company in the “Water Security” category by CDP, an international NGO that evaluates environmental initiatives and information disclosure. This marks the fourth consecutive year that Nagase has earned this distinction.

The NAGASE Group aims to realize “a sustainable world where people live with peace of mind” by pursuing corporate activities that contribute to solving social and environmental issues under our Sustainability Basic Policy. We believe these efforts are essential for sustainable growth. In particular, we recognize that the environment is a fundamental prerequisite for all activities. Accordingly, we actively promote initiatives to tackle environmental issues, including the transition to a low-carbon society, the development of a circular economy, pollution prevention, biodiversity conservation, and responsible water use.

In the water security field, where we received the highest rating, we have identified “Driving a Circular Economy” as a materiality (key issue). Our goal is to achieve a circular economy that balances reducing environmental impact with economic growth, including efficient water use. To this end, we have implemented water management plans, improved utilization efficiency, and reduced water consumption, focusing on manufacturing sites with high water intake and discharge volumes.

Our continuous efforts and information disclosure have contributed to our recognition on CDP’s Water Security A List for four consecutive years.

We will continue working to minimize the environmental impact of our business activities and contribute to “a sustainable world where people live with peace of mind.”
